CARVIN Introduces the EQ230 & EQ430 Graphic Equalizers

Multi-Channel Control with Microsoft Windows® PC Software Interface

Short Version

Carvin is pleased to announce two new additions to our X-Drive™ lineup of pro audio equipment, the EQ230 and EQ430 30-band precision digital graphic equalizer/delay units. These 1RU devices have incredible flexibility with sonic excellence that will enhance the performance of any system to improve overall sound, help eliminate feedback, protect drivers and provide delay. The two-channel EQ230 and four-channel EQ430 feature 30 1/3 octave constant Q filters, an adjustable output limiter, high-pass and low-pass filters, input gain and up to 120ms delay. Each channel has balanced XLR and 1/4" TRS inputs and outputs. Carvin X-Drive PC Network™ software for Microsoft Windows® PCs or Mac OS plus USB connectivity allow for simple setup and storage of system parameters with your laptop.

Full Version

San Diego, CA – JAN 2012 Carvin, the name musicians everywhere trust for high quality USA-made guitars, basses, instrument amplifiers, recording equipment, and sound reinforcement products, is excited to announce two new additions to our X-Drive™ lineup of pro sound equipment, the EQ230 and EQ430 30-band precision digital graphic equalizer/delay units.

The single rack space two-channel EQ230 and four-channel EQ430 are the next generation of professional-quality audio tools for studio and live sound reinforcement. These devices have incredible flexibility with sonic excellence that will enhance the performance of any system to improve overall sound, help eliminate feedback, protect drivers and provide delay. They are compatible with all audio sources, and can be used in conjunction with Carvin's new XD360 3X6 Speaker Management System for overall adjustments and feedback elimination. The EQ230 and EQ430 are simple to connect and easy to use, with frequency buttons for every band, allowing for easy, rapid adjustments. Both models feature 30 1/3 octave constant Q filters, an adjustable output limiter, high-pass and low-pass filters, input gain and up to 120ms delay, which allow for complete control of your system. Each channel has balanced XLR and 1/4" TRS inputs and outputs. A back-lit 192 X 32 graphic display makes adjustments easy, even in a darkened working environment.

The Carvin X-Drive PC Network™ software for Microsoft Windows® PCs or Mac OS and the USB connectivity of the EQ230 and EQ430 allows for simple setup and storage of system parameters with your laptop and facilitates remote control of the device, which makes on-the-fly adjustments of installations and live sound fast and easy. Each model can internally store, label and recall up to 16 different setups, and the X-Drive software can store unlimited setups on a computer. Password protection helps prevent against accidental modification of saved settings.

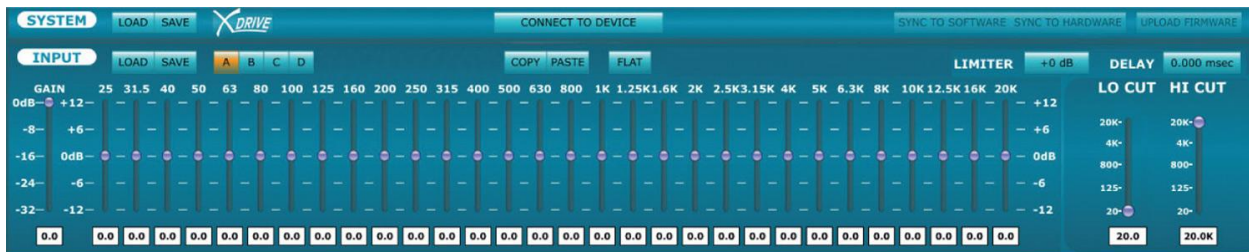

The EQ230 and EQ430 equalizers are made in the USA by Carvin. Read more at <http://www.carvin.com/xdrive>.

About Carvin

Since its launch in 1946, Carvin has specialized in building and selling high quality musical instrument products direct to the consumer. The company's innovative factory-direct approach has grown from a catalog mail order service into a large-scale manufacturing / retail business with a strong Internet presence. Today, Carvin customers can instantly purchase everything from customized, handcrafted instruments to tour-ready professional audio systems. With more than 60 years of achievement, Carvin continues to grow its relationship with musicians worldwide by offering an extensive range of guitars, basses, instrument amps, recording, and P.A. products. To order, visit us online at www.carvin.com or call 800-854-2235.
